"Where Cool Stuff is Show Tuff!"

From Crawford International Theatrical Corporation

IT'S 'BEYOND' THE WATER

All of CITC'S fluids are produced here in Washington. We start with the freshest water from crystal clear reservoirs. It then undergoes reverse osmosis, removing any unwanted particles or chemicals. The result is water at it's purest with high oxygen content. We then add ingredients and chemicals which are rated food grade quality or better. This is why CITC's haze and fog machines never get clogged! You can be confident that we had the safest ratings for our haze and fog when it came to testing by Environ Lab.

WORLDWIDE DISTRIBUTION

CITC'S PROFESSIONAL QUALITY FLUIDS ARE SHIPPED WORLDWIDE. THEY ARE CREATED BY THE WORLD FAMOUS SPECIAL EFFECTS COORDINATOR, GARY CRAWFORD.

5-GALLON CUBITAINER WITH HANGING HARNESS
