

MISTIFYER ANTI-DRIP SYSTEM

The Mistifyer comes in a variety of sizes to fit your needs. Adjustable, moveable, yet made for durable installations. Variety of sizes now includes 12 models, each with smaller size nozzles for more coverage and dryer special mist effects.

(Sneak preview of special features)

This bottom view of what's hidden gives insight into just some of the great features of this new unit.

- Brass water-inlet
- Brass water-outlet
- Clear filter housing
- Air inlet & vents all around
- Easy off inspection nuts
- Sturdy roto-molded legs
- Durable, roto-mold housing

The new Mistifyer System features the newest in durability and safety with hidden advances, yet with the same quality of CITC's Jungle Mist System. New dryer nozzles make it possible to be used indoors as props, effects, projection curtain, glo-effects, highlighting effect, ora effect, ghostly effect, for stage, theatre, live performances, operas, ballets, amusement parks and more. Designed for creative artists, technical directors, effect technicians and stage hands by being changeable, yet waterproof, strong and long-lasting.

New Features include components built for long-term constant daily use:

1. Durable, un-rustable, rotomold cover now easier to R&R (Remove & Replace) the top (2 nuts located center left & right).
2. Vented bottom with increased air circulation through the bottom
3. Water-shed cover keeps water out, lets air in through the bottom & side vents
4. A clear housing built-in water filter for clean-running inspection
5. Brass quick-disconnect filter fittings for easy filter change
6. Protected recessed brass water connections with quick-disconnects
7. Protected water release for high pressure relief each shut-off (stops the drip).
8. Protected (recessed) sturdy brass quick-disconnect fittings
9. Protected water-proof outside electrical on/off switch
10. A pre-filter located outside on the water input for easy cleaning
