

Super Foam Dome™

CITC's Super Foam Dome delivers an incredibly, dry foam when used with the Foam Dome Indoor Fluid. So dry, that the unit is the number one pick for nightclubs and events nationwide. You won't have to have your guests stripping down in order to have fun in this incredibly people-friendly foam. Completely manufactured in the USA by award-winning CITC product designer, Gary Crawford, the Super Foam Dome is built to last for many, many years. Another great feature about the product is the speed in which the foam produced. Super Foam Dome delivers more than 2X the foam in ½ the amount of time compared to other models which have tried unsuccessfully to match the great professional features of this machine. Another great new feature is that the unit uses less foam fluid per CFM than almost any other foam machine on the market today.

The Super Foam Dome is a 1HP foam machine with a 25' (8m) electric cord and GFCI switched plug, high pressure pump, extra large custom modulator, 25' (8m) connecting tubing, and safety cable. All that's needed is a 55 gallon drum for adding the fluid to 50 gallons of warm water. Fill a 20' x 20' x 6' (51 cm x 51 cm x 15 cm) area in approximately 5 minutes. Super Foam Dome Outdoor Fluid is also available.

120V P/N #100216
Dimensions: 19" x 19" x 19" (48cm x 48cm x 48cm)
Weight: 65 lbs (12 kg) (plus pump: see below)
Power: 1 hp: 120 VAC, 60 Hz, 20 A
Power Cord: 25' (7.6 m)
GFI switch box: Two outlets with lighted power switch
GFI Power Cord: 8' (2.5m)
Fluid pump: High-pressure diaphragm pump 45 psi (3.1 bar) / 1.4gpm (5.3 lpm)
Wt/Dims fluid pump: 5lbs (2.3 kg) / 7"x5"x5" (18x13x13cm)
Type of Fluid: Super Foam Dome™ fluid/water mix
Output: 10,000 cubic feet per minute
Fluid Consumption: Approx 1 gallon per minute (3.8 l/min)
Hose: 5/8" x 25' (1 cm x 7.6m) plastic
Barrel supplied by user: 55gal (209 liter) plastic
Limited Warranty: One year
