

Cool Stuff That's Show Tuff!_

SUPER SPRING INVENTORY SALE!

Now until May 31st, CITC is having a fantastic inventory sale of some of our most popular products.

Just mention "Super Spring" when you order, and you'll get

20% off

the following products while supplies last.

No kidding!

(No other discounts apply.)

Little Blizzards!

Whether it's a Little Blizzard XT or a Little Blizzard XT/SP, they are both the best-made and most-durable snow machines on the market today. They are on sale through the end of May as long as they are available in stock. Don't wait to order; these will go fast.

Hurricane II Floor and Hanging Models (non-DMX only on sale)

These fans are a favorite because they have 3 very smooth speeds which act like a variable speed and never overheat. CIBC's designed hanging bracket is the most reliable and safe one on the market. More rotation than any comparable fan.

AquaMax MP

Get on board with the latest technology. This is an Award-winning, odorless, water-based, organic haze machine that produces up to a 2-hour hang time. Very few left in stock. Call today to reserve yours.

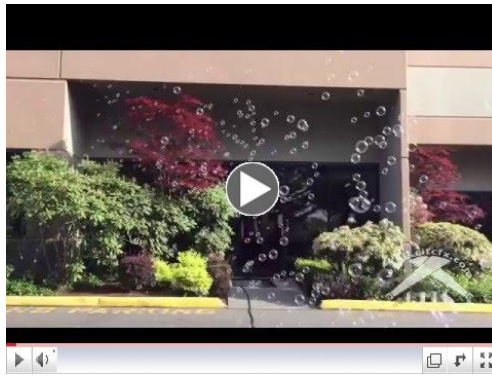

BubbleMax X2

Experience the difference! This is a brand new and improved, CITC-designed double-wand bubble machine. Choose to use one wand or both. Stronger body, less splatter, and better output than former BubbleMax units. BubbleMax X2's and BubbleMax X2 Auto-fills are both on sale.

(Systems including the stand and fan are not on sale.)
