

INFINITY™ FLUID SUPPLIER

- Automated filling mechanism
- Lightweight body
- 24 hour timer w/ Battery Backup
- Easy setup
- Pumps up to 150' horizontally and 20' vertically
- No spillage or over filling
- Automatically keeps fluids replenished for long periods of time
- High-volume pump for fast refill
- Use with a variety of equipment

CITC's Infinity™ Fluid Supplier allows you to safely maintain fluid levels in your bubble, snow, fog, haze or other effects machine. It is a revolutionary new product using a timer and float switch system to refill an included 2½ gallon container from a 55 gallon drum or other fluid source. You can supply fluid for days, weeks or even months without the labor of having to manually fill every few hours. A low-voltage cable runs from the container switch to the pump unit to prevent overfill. Use the electronic timer to schedule the days and hours of the refilling periods automatically! For water-based fluids only.
