

DJ HAZE

REGULAR & HANDS FREE

FANTASY FX[®]

With DJ Haze, you can create amazing atmospheric effects such as beams of light slicing through the air or the appearance of steam or smoke on the dance floor. With no need for expensive, complicated and heavy haze machines, DJ Haze is the quickest, easiest and safest solution for DJ's and event and party planners! Compact for easy transportation between venues.

Use DJ Haze to instantly add lighting effects to your event or venue!

SUGGESTIONS FOR USE:

- To help ignite the dance floor, use the DJ Haze to accent the perfect lighting atmosphere for your crowd – just spray for 20-30 seconds until you get the desired effect.
- To create colored haze effects, add a color changing light that shows beautiful slices of color on the dance floor.
- To create a haze effect around the DJ use a back light for smoke, side light for steam, or a front light for a sheer haze effect.
- Create haze for your venue for up to half an hour with 20-30 seconds of DJ Haze. Dance the night away with a single can!
