

# HAUNT HAZE

REGULAR & HANDS FREE

# FANTASY FX<sup>®</sup>

From a mysterious, long-lasting fog covering to a quick burst of steam or vapor, having the right balance of smoke and dissipation is key to ensuring your Haunt Show stays on schedule. Haunt Haze is the quickest, easiest and safest way to create a spooky forest or an eerie graveyard and give your guests a real fright! Haunt Haze easily creates spooky haze effects for your Halloween event.

#### SUGGESTIONS FOR USE:

- To add low lying fog to the floor or fill the air with Haunt Haze, spray 1-2 minutes to emphasize the lighting or laser effects that will make your Halloween Party or Haunted House ghostly scary. One canister can last all night for continuous haze.
- To hide things in the haze or enhance light, spray Haunt Haze 1-2 minutes and light from the front for densest fog.
- Spray continuously to give objects a mysterious, spooky depth. Use side lighting for eerie shadows.
- To create a still, haunted scene, spray a room for 20-30 seconds and give your guests the fright of their life.
