

# PHOTOGRAPHY HAZE

REGULAR & HANDS FREE

## FANTASY FX®

Create stunning photos or videos indoors or out with atmospheric effects created with Photography Haze. Our haze is the most convenient and safe way to add haze or fog to any session without needing power or carrying heavy equipment and it fits in your camera bag or backpack for easy transportation between shoots.

Use Photography Haze as a great lighting tool to enhance and professionalize your images.

### SUGGESTIONS FOR USE:

- Create Atmosphere and set the mood or tone of required shot.
- Control Contrast and change light quality of scene.
- Create “rays” of light, simulate smoke, dust or morning fog.
- Haze or fog reflects light. With more fog or haze achieve more reflection.
- Ensuring the right source, location and angle of light will achieve best results.
- Right angles tend to emphasize the effect.
- Effect of fog or haze can be enhanced with colored lights.
- Can use any light source: Natural light (sun, moon etc.), spot lights, pars, follow spot, track lights, or even a flashlight for beam.
- 30-60 seconds of Photography Haze can last several hours in a still room.
- To use outside, make sure you have enough light and spray 1-2 minutes from the front for the densest fog, or spray continuously for billowing clouds.

## FANTASY FX® PHOTOGRAPHY HAZE SPECS

Photography Haze #100008

Hands Free #100009

- **Net Weight:** 8 oz
