

PROFESSIONAL HAZE

REGULAR & HANDS FREE

FANTASY FX[®]

Fantasy FX[®] delivers the only stage haze, steam and fog effect without needing a technical expert. Used in Television, Movies, Theatrical Productions, Nightclubs, Photo Shoots, or anywhere a professional haze or fog effect is needed. Fantasy FX[®] is odorless and versatile.

FOR BEST RESULTS:

- To create stunning haze effects that amplify lighting, spray 15-20 seconds to illuminate lighting from behind.
- To get a fog effect, spray 1-2 minutes and light from the front for densest fog.
- To enhance the color of the fog or haze appearance: use spot lights, pars, follow spot, track lights, or even a flashlight for beam.

HOW TO USE PROFESSIONAL HAZE:

- Spray away from people, furniture, curtains, and food.
- In the unusual event that there's overspray, wipe off with a soapy cloth.
- To remove fog from room, ventilate by opening doors and windows.
